

# Let's Explore!

Do these activities a few times a year and discuss how the outcomes change.

- Do you see animal tracks? Try to identify them.
- Take a crayon and paper and do a tree rubbing. Identify the tree
- How many different color leaves do you spy?
- Is the forest loud or quiet today?
- Stop a minute and crouch down. What do you see?
- What animals do you think live here?
- Lay down on the trail and look up at the trees.

# Let's Explore!

Extend your learning at home

Let's do some shoe rubbings!

- Collect some shoes from everyone in the house.
- Take some plain white paper and a dark-colored crayon.
- Place the paper over the sole of the shoe and rub the crayon over the sole.
- Mix up the rubbings and shoes and try to identify which track print belongs to each shoe.

Explore animal tracks from your area by researching on the internet or borrowing some library books.

# Hi!

Thank you for visiting and downloading my product. Your purchase allows you to use this product in your home and homeschool. However, there are a few restrictions.

## You May:

- Use these files for personal use.
- Download and save the file to your personal computer.
- Print as many copies as you would like for personal use.

## You May Not:

- Edit the file.
- Share this file or a printed copy of this file with anyone else. (please refer them to my site)
- Sell this file to others.
- Claim them as your own.

Thank you for your honesty! Wishing your family homespun happiness!

*Heather*
